

RED-E 4 CYCLE OIL

RED-E Hi-Performance 4 Cycle Oil is an ashless blend of superior quality, premium synthetic base oils that are specially formulated for today's high tech small racing engines. **RED-E**'s "oiliness" additive is an integral ingredient that reduces friction and wear. **RED-E** provides excellent thermal stability, anti-wear protection and oxidation prevention. **RED-E** has a superior friction modifier that will allow engines to accelerate quicker and turn more RPM's on the top end. **RED-E** will eliminate major carbon deposits and allow for superior ring and valve seating. It is not necessary to flush your engine when changing to **RED-E**.

Typical Specifications:

<u>Weight</u>	<u>VI Index</u>	<u>Flash Point</u>
20	179	392

Features:

- | | |
|---------------------------------------|--|
| (1) Reduces friction and wear | (8) Extreme pressure performance |
| (2) Superior ring and valve seating | (9) Reduces engine temp's up to 30 degrees |
| (3) Faster throttle response | (10) Gains up to 300 rpm |
| (4) Smokeless | (11) Eliminates dry starts |
| (5) Low foam tendency | (12) Sustains compression |
| (6) Resistance to high temperature | |
| (7) Antiwear and oxidation prevention | |

Applications:

All small engine racing applications
